## Wood Species and Material Information

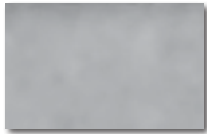

**CHERRY** has a rich color and smooth, flowing grain patterns. Color varies from light pink to dark brown; variations are more prominent with lighter stains. Cherry will darken or mellow with age, a change that is more noticeable with light stains and which usually takes place within the first six months. Sun exposure greatly accelerates this process. Mineral streaks, pitch pockets, pin knots and sap wood all occur naturally in cherry and are acceptable characteristics. A straight-grain cherry veneer slab door is available, see Nicollet door style page for further details.

**HICKORY** can vary dramatically in color within a single piece of wood, from almost white to a deep, dark brown. Hickory's bold, prominent grain patterns give it a rustic appearance. Burls, pin knots, mineral streaks and small, sound knots are typical and are not considered defects.

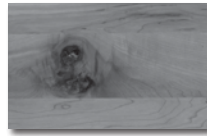

**KNOTTY ALDER**, when finished, is a rich-looking wood that blends well with cherry. It has a very uniform light brown color with a reddish tinge and has a fairly straight-grained, uniform texture. Knotty alder may contain pin knots, open and closed knots of various sizes, checking and mineral streaks; these are typical and not considered defects. Some knots may be in locations which affect hardware placement.

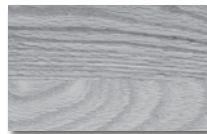

**MDF (Medium Density Fiberboard)** is an engineered wood product made by breaking down hardwood and softwood into wood fibers and combining with resin. Pressure and heat are then used to create a smooth surface with a consistent core. Painted MDF is durable and more resistant to warping, expansion and contraction than solid hardwoods. **NOTE:** Select components and moldings ordered in MDF door styles will be constructed of maple and painted to match your order selection. MDF door styles are available in select door styles in paint finishes; see finish charts for availability.

**MAPLE** has a smooth texture with tight, uniform grain patterns that make it ideal for painting. It is generally creamy white, varying slightly from almost bright white to light pink or reddish brown. Maple contains a natural resin that causes wood to turn amber as it ages. This change, which is accelerated by exposure to natural light, is more noticeable with lighter stains. Maple may occasionally contain small mineral streaks that form naturally when trees absorb minerals from the soil. A straight-grain maple veneer slab door is available, see Nicollet door style page for further details.

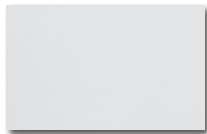

**RUSTIC MAPLE** is a dense hardwood with smooth texture and closed grain pattern. This rustic species includes open and closed knots of various sizes, bark pockets, worm holes/tracks, mineral streaks and non-structural splits. Knots may be in locations which affect hardware placement. Rustic maple varies dramatically in color, which can be evident within a single stave of wood. Variations in the wood's color range from creamy whites and light tans to almost black in knotty areas, bark pockets and mineral streaks. The dramatic color shift will be most evident when rustic maple is ordered in our lighter stains. Medium and dark stain colors will obscure much of the wood's color variation and the overall finish will appear more consistent. Rustic maple can amber or yellow with exposure to light due to natural resins absorbed over time and will be most apparent when our lighter stain colors are selected. The above listed characteristics are acceptable and typical of rustic maple and are not considered defects. In addition, it is important to note that each door, drawer front and cabinet component/accessory will include varying amounts of the character elements listed above.

**OAK (RED)** is characterized by its open grain patterns, which vary from close-knit and vertical, to prominent and arched, with colors ranging from light tan and pink to medium dark red and brown. Oak may contain small mineral streaks and some pin knots.

**QUARTERSAWN OAK** is quartered and then cut at a 90-degree angle to the growth ring of the tree. This process exposes a beautiful aspect of the grain called "flake." In addition to flake, quartersawn grain pattern is vertical and close-knit. Its color ranges from light tan and pink to medium dark red and brown. Quartersawn oak is a dense, heavy wood that is very strong and resists shock. This cut of red oak has been used extensively in the production of Mission style furniture. **NOTE:** For flat panel door styles, the center panel back is consistently 'Grade A' red oak; however, cut of material varies using flat sawn, rift sawn and quartersawn veneers. A straight-grain quartersawn oak veneer slab door is available, see Nicollet door style page for further details.

**PAINTED** products have certain inherent characteristics that must be expected. Small hairline cracks may appear where wood joints occur in door/drawer fronts. Also, some grain patterns of the wood may be apparent through the painted finish. Lighter painted finishes should be expected to show a slight color change over time. These characteristics are inherent and will not be considered defective.

## Why is this important?

We call your attention to these characteristics because the effects of these variations in an entire kitchen may be different from what one visualizes when viewing a small display, a single door or a small sample. Most wood doors and drawer fronts are constructed using different pieces of wood and each piece will accept stain in different ways. These variations in grain and color are inherent in the wood and a natural enhancement to our product.

*We feel the beauty of real hardwood is created by the infinite variation of grain texture and color. This is the nature of hardwood; wild or unusual graining will not be considered reason for replacement.*

We take care in selecting our doors; however, there is no special emphasis made to select doors to match one another. Contrasting grain or color variations in doors is considered acceptable and will not be considered reason for replacement.

Wood cabinetry is also affected by humidity. Slight shrinking may be caused by humidity changes in the home. We recommend the use of an air conditioner and humidifier to control humidity in the home.

For further information please contact our **Customer Care Department**.

**NOTE:** Woodgrain direction on drawer fronts and doors specified on door detail pages with following symbol: 

## Finish Information

### DESIGN NOTE

#### End Panel Construction

**Iconic Series** cabinetry\* receives furniture board end panels with non-matching woodgrain laminate.

**Iconic Series** cabinetry\* with **All Plywood Construction** (PLYBOX option) receives unfinished plywood ends.

**Remember to specify finished ends for all exposed ends of cabinetry\*.** See end treatment options in Section 1100 for details.

\*Certain cabinets include finished or flush finished wood ends as a standard inclusion; see individual cabinet specifications throughout this manual.

See finish charts for door style/species/finish availability and pricing. Please view samples for proper representation of all our finishes.

## UNFINISHED

*Not available in MDF Door Styles*

Our products and wood finishes undergo stringent quality tests and are KCMA certified and warranted as finished wood cabinetry. Ordering unfinished cabinetry voids the warranty; no charge replacement policy guidelines apply to the following three exceptions:

- Incorrectly built items
- Shipping damage as noted on Bill of Lading
- Drawer guides and hinges retain standard lifetime limited warranty

Wood will expand and contract with changes in temperature and humidity. Unfinished cabinetry must be stored in a climate-controlled environment and a proper wood finish applied in order to minimize contraction and expansion.

#### Additional notes for placing unfinished orders:

##### Internal Components

Drawer boxes, roll-out trays, lazy susan trays, spice drawer pull-outs and other internal kits will be finished with clear top coat as is our standard process.

##### Interior and Shelves\*, Exterior Cabinet Tops and Bottoms

Iconic Series cabinetry receives laminate maple interiors, shelving and exterior cabinet tops/bottoms in a light finish. Cabinetry with PLYBOX option receives maple plywood interiors, shelving and exterior cabinet tops/bottoms with a clear top coat.

For both options, specify matching finished interior and flush finished top/bottom modifications to receive finish ready components in wood species matching your order selection as needed in your design.

**NOTE:** Matching finished interior only (FIO) modification includes the following finish ready components: shelving, interior back/sides/top/bottom of cabinets; exterior components are not finished. Internal components will receive clear top coat as noted above.

##### End Panel Construction\*

Iconic Series cabinetry receives laminate ends; laminate color is selected at our discretion and may vary from cabinet to cabinet. Cabinetry with PLYBOX option receives unfinished end panels constructed from non-finish grade plywood.

For both options, specify finished end modifications on exposed ends of cabinetry to receive finish ready ends in wood species matching your order selection.

\*Matching finished interiors and finished end panels are standard in some cases; see individual cabinet specifications throughout this manual for details.

## STAIN FINISHES

Stain finishes allow the natural beauty of wood to show through and be visible, some colors more than others. Our stain finishes have a multi-step finishing process including an oven-cured top coat which provides a seal superior to most manufacturers. A beautiful and durable finish is the result of this process.

End grain surfaces and softer areas of wood may accept more stain and appear darker than other areas on the door or drawer front. This is the natural reaction of wood and the variances are not controllable. Visible lines are normal at the joints on doors and drawer fronts. Doors with veneer center panels will vary in absorption of finishes, and may appear slightly lighter or darker than the solid wood stiles and rails surrounding the panel. Be aware that environmental conditions including humidity and smoke, will affect how much any finish will change over time, some species and/or colors more than others.

It is important to note that lighter finishes will especially exhibit color variances naturally found in wood due to the transparency of the stain while darker finishes have an overall consistent appearance. The wood species selected will alter the appearance of these finishes; the grain, character and tone of the wood will show through the stain. However, the color variances of wood will be less apparent when darker finishes are chosen.

### Peppercorn

Peppercorn is a multi-layered semi-transparent stain finish that combines a light gray base with a hand-wiped charcoal overlay for a warm gray overall color. Due to the semi-transparent nature of the finish, the grain and color of the wood species will be visible and the finish opacity and color will vary based on the character of the wood. The hand-wiped charcoal overlay will "hang-up" in corners, profile edges, and open grain areas of the wood, such as end-grain. Peppercorn is offered on select wood species due to the variable nature of the finish. It is also available with Ebony Glaze in a Highlight only or Glaze with Highlight application. Antique or Legacy distressing also available.

### Cappuccino

Cappuccino is a multi-step stain that combines a semi-transparent ivory undertone with a hand-wiped charcoal overlay for an overall caramel/gray tone. The charcoal overlay pronounces the grain and character of the wood species and creates an illusion of texture notable on Quartersawn Oak. Cappuccino is offered on select wood species due to the variable nature of the finish. With Burnt Sienna Glaze with Highlight, the overall color appears more caramel in tone. Antique or Legacy distressing options also available.

Please see a sample for complete understanding of the rustic-luxe appearance of Peppercorn and Cappuccino. See following pages for further details on our glaze options and Antique and Legacy distressed finishes.

## Finish Information

See finish charts for door style/species/finish availability and pricing. Please view samples for proper representation of all our finishes.

### PAINT FINISHES\*

#### Classic Paint Finishes

Available on MDF and maple.

Classic enamel adds lustrous color and completely opaque coverage. For the best final result, we begin with a catalyzed base primer fill coat to prepare the surface for even coverage of the catalyzed pigmented enamel. This creates a furniture quality satin finish which protects and seals for long-lasting beauty and durability.

#### Carriage Black Classic

Available on hickory, MDF, maple, oak and quartersawn oak.

Consistent with our other Classic Paint finishes, Carriage Black Classic finish consists of black enamel, completely opaque in coverage. When applied to oak, hickory and quartersawn oak the grain character and texture are emphasized and apparent. Carriage Black Classic on MDF and maple offers a smooth, classic finish.

### GLAZE APPLICATIONS – Applicable to Stain and Paint\* Finishes

#### Highlight Only

This finish technique is achieved by hand brushing glaze on select profiles of doors and drawer fronts to enhance the detail without changing the overall color and appearance of the sealed base stain or paint color. In addition, molding profiles, decorative turnings and wainscot material also receive these brushed highlights. Characteristics inherent in this process include hang-up on profiles/inside corners and defined brush strokes. Intricate moldings, such as carved onlays, as well as smooth surfaces of cabinets and accessories do not include this highlight detail. Examples of smooth surfaces include: face frames, end panels, matching finished interiors and flat areas of doors/drawer fronts. Molding and accessories that do not receive highlight detail are noted in Sections 800 and 1000. An oven-cured satin finish top-coat completes the process, providing a durable and beautiful finish.

#### Glaze with Highlight

This finish technique is achieved by spraying a glaze coat over the sealed base stain or paint color, then wiping it off by hand. This process alters the overall color and appearance of the base finish and is applied to all finished components\*. The profile edges of doors, drawer fronts and molding receive hand-brushed detailing creating defined accent lines. Characteristics inherent in this process include uneven hang-up, rag marks in corners and glaze hang-up around natural characteristics in the wood, with defined brush strokes and defined hang-up on profile edges. Molding and accessories that do not receive highlight detail are noted in Sections 800 and 1000. An oven-cured satin finish top-coat completes the process, providing a durable and beautiful finish. This finish option adds depth and a patina to the base color and emphasizes profiles and grain patterns in doors, drawer fronts and moldings. As with normal aging, the patina varies throughout the kitchen and within individual doors or surfaces.

\*Components include: cabinet face frames, doors and drawer fronts, decorative moldings, decorative accessories, all finished ends and matching finished interiors.

#### \*Painted Finishes

Painted finishes for orders in wood door styles are applied to hardwood doors, drawer fronts and cabinetry components; however, to achieve the highest quality finished product, we reserve the right to utilize engineered material in combination with hardwood material for various parts of cabinetry. This includes center panels of door and drawer fronts, end panels, back panels and other finished parts. Face frame material for orders in all material types will be consistently closed-grain hardwood material. As with any painted wood surface, expansion and contraction with changes in climate will cause hairline cracking in the paint surface at joinery points. This is an acceptable characteristic and will vary based on climatic changes. *It is recommended to avoid applications with painted cabinetry where the climate cannot be regulated.*

## Finish Information

See finish charts for door style/species/finish availability and pricing. Please view samples for proper representation of all our finishes.

### DISTRESSING OPTIONS FOR STAIN FINISHES

Available in stain finishes with glaze and highlight (GLZHGLT\*).

#### Antique

Antique Distressing is a finish process created by lightly distressing wood for a subtle worn appearance. Antique Distressing characteristics include sanded corners/profiles of doors and drawer fronts, as well as small dings and dents.

#### Legacy

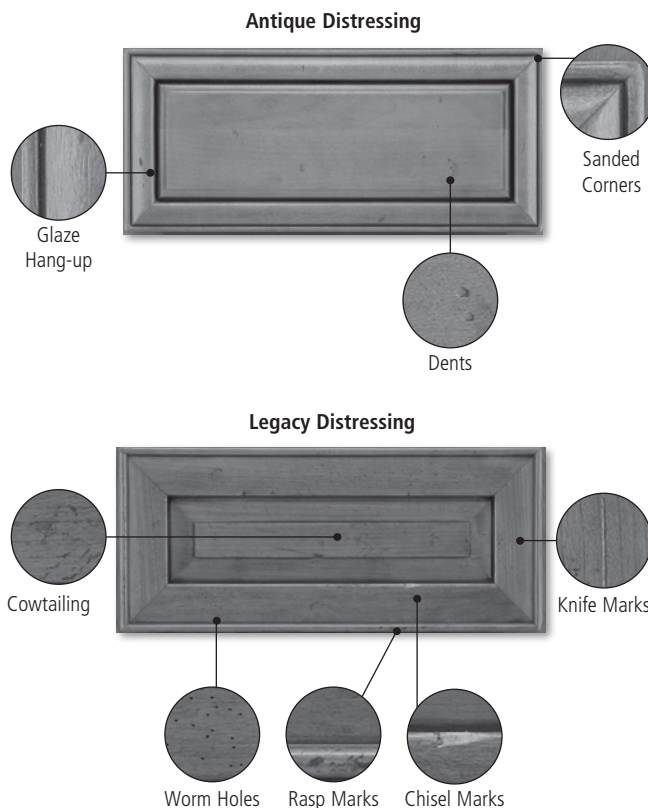

Legacy Distressing is a finish process created by physically distressing wood for an aged appearance. Legacy Distressing characteristics include sanded corners/profiles, small dings and dents, rasping, worm holes, chisel marks and knife splits. In addition to physical distressing elements, cowtailing is applied.

All elements of Antique and Legacy Distressing vary by cabinet component; view a sample door for proper representation. Distressing is applied to doors, drawer fronts, all finished end treatments, exposed face frames, moldings, decorative legs/feet, plywood panels, wainscot material, deluxe panels, accessories and wood tops\*\*.

Standard face frames (cabinets with doors and drawers) and matching finished interiors/shelving of cabinetry do not include Antique or Legacy Distressing; however, the glazed finish is maintained.

\*See Antique/Legacy chart on page 200.14 for availability. Distressing is not available on 1/4" flat panel door styles or MDF doors.

\*\*Some moldings/carved accessories are not distressed due to their scale or intricate detail.

### DISTRESSING OPTION FOR PAINT\* FINISHES

#### Heirloom

Available on maple.

This multi-step painted finish creates the appearance of wear and patina of an heirloom furniture piece. A base enamel paint coat with a glaze and highlight process are combined with random distressing and sanding of pieces at various stages to produce this finish. In addition to hang-up of glaze and unique patina on flat surfaces, Heirloom finished product is sanded through the painted finish to expose natural wood or grain and create the effect of wear with age. After the sanding process, product receives a final clear conversion varnish top-coat that is oven-cured for durability.

As with normal aging, the patina and worn edges vary in severity throughout the kitchen and within individual doors or surfaces. Wear lines vary in thickness and degree. Application characteristics inherent in this process include uneven hang-up on profile edges, rag marks in corners and glaze hang-up around natural characteristics in the wood.

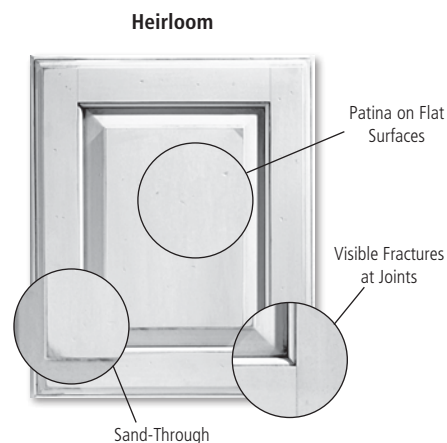

#### Carriage Black Heirloom

Available on cherry, hickory, knotty alder, maple, oak and quartersawn oak.

Consistent with our other Heirloom Paint finishes, Carriage Black Heirloom finish consists of black enamel paint coat with a glaze process which is lightly distressed and worn through creating the appearance of an heirloom furniture piece. Please note this finish does not receive highlighting. When applied to oak, hickory, cherry and quartersawn oak; the grain character, texture and hue variations are emphasized and apparent. When applied to knotty alder, pin holes and knots are randomly emphasized further enhancing the charm and character of the Heirloom finish. Maple offers a smooth appearance on flat areas of cabinetry/doors while maintaining the characteristics of Heirloom.

#### \*Painted Finishes

Painted finishes for orders in wood door styles are applied to hardwood doors, drawer fronts and cabinetry components; however, to achieve the highest quality finished product, we reserve the right to utilize engineered material in combination with hardwood material for various parts of cabinetry. This includes center panels of door and drawer fronts, end panels, back panels and other finished parts. Face frame material for orders in all material types will be consistently closed-grain hardwood material. As with any painted wood surface, expansion and contraction with changes in climate will cause hairline cracking in the paint surface at joinery points. This is an acceptable characteristic and will vary based on climatic changes. *It is recommended to avoid applications with painted cabinetry where the climate cannot be regulated.*

## Finish Information

See finish charts for door style/species/finish availability and pricing. Please view samples for proper representation of all our finishes.

## SPECIALTY FINISHES

### Appaloosa Collection

*Buckskin Appaloosa, Dove Appaloosa, Peppered Appaloosa, Silver Appaloosa*

The Appaloosa Collection features semi-transparent stains in shades of white, gray or brown with glaze detail and distressing. In addition to glaze hang-up, cowtailing and brushed glaze accents are added to enhance the depth of the finish. Dents, softly sanded corners, knife splits, chisel marks and worm holes complete the aged appearance. All physical and finish elements are hand applied and vary in application by piece; no two pieces are identical. Grain patterns of wood and other wood characteristics will show through the multi-layered finish and vary based on the wood species selected. Some wood species will absorb finish differently from stave to stave within a single door/drawer front. All elements vary by cabinet component. The final appearance is a unique timeworn finish that is protected by a satin finish top coat for long lasting beauty and durability.

The Appaloosa Collection specialty finishes are applicable to doors, drawer fronts, all finished end treatments and decorative accessories\* (moldings, decorative legs/feet). Face frames and matching finished interiors include finish elements but do not include physical distressing elements. Back sides of cabinet doors/drawer fronts are not distressed and do not receive brushed glaze accents or cowtailing; this causes the finish to be lighter than the front side.

\*Some moldings/carved accessories are not distressed due to their scale or intricate detail.

**Buckskin Appaloosa**

**Dove Appaloosa**

**Peppered Appaloosa**

**Silver Appaloosa**

### Stoney Brooke Collection

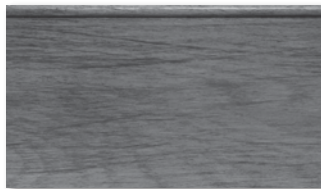

The Stoney Brooke Collection evokes a vision of a mountain stream and the natural beauty of rocks that withstand years of weathering, only to emerge more beautiful. Each stone is unique and striking in appearance; nature creates subtle shades and textures of browns and grays.

This finish is achieved by artfully brushing glaze materials onto the stained surface. These materials are thicker than normal glazes and leave behind a subtle texture and textural appearance on top of the stained surface. The varying shades of application create a playful interaction on each piece. When combined with other cabinets or design elements in a project, the overall impression evokes fluid movement and beauty found in nature.

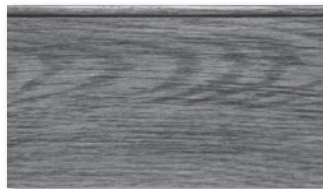

Cabinet interiors and shelves of matching finished interior cabinets receive the complete stain and glaze finish process for the Stoney Brooke Collection. Please note that the back sides of cabinet doors/drawer fronts do not receive glaze material; these areas will be stained the base color but will not receive the textural glazing of other finished components. Glaze is not applied to the inside scoop of raised panel doors intentionally. Characteristics inherent in this process include uneven glaze application with varying amounts of glaze as well as an uneven textural appearance and feel. An oven-cured satin finish top-coat is the final step in this process, providing a durable and beautiful finish.

**Boulder**

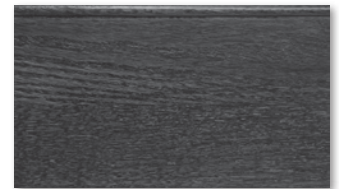

**Cobblestone**

**Greystone**

**Shale**

## Finish Information

See finish charts for door style/species/finish availability and pricing. Please view samples for proper representation of all our finishes.

## SPECIALTY FINISHES

### Coastal Sheer Collection

*Semi-Transparent Finish – Sheer / No Dry Brush Accents*

*Castle Rock Sheer, Cottage White Sheer, Harbor Mist Sheer, Islander Sheer, Seagrass Sheer*

Coastal finishes are semi-transparent, meaning natural wood color and texture will affect the overall look. These sheer, yet pigmented, oven-cured satin finishes are applied to all cabinet components\* for a color-washed appearance that leaves some natural wood characteristics slightly visible. Some Coastal colors are more transparent than others, affecting the amount of visible woodgrain. In addition, the texture of wood with an open grain pattern (such as oak) will be more prominent than the texture of wood with a closed grain pattern (such as maple). For example, Castle Rock on maple shows some woodgrain, while Harbor Mist, Islander and Seagrass on maple show little to no woodgrain. But on an oak door, wood characteristics are much more visible for all these colors.

\*Engineered material in combination with hardwood material may be utilized for various parts of the cabinetry.

Semi-Transparent Finish –  
Sheer / No Dry Brush Accents

### Coastal Collection

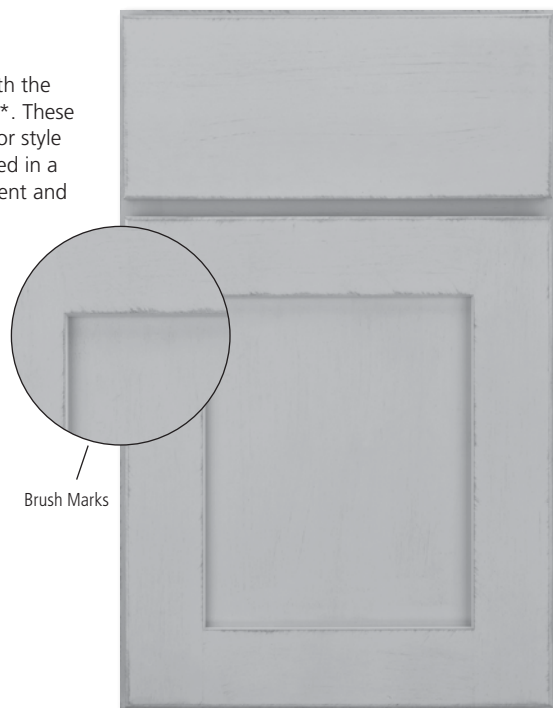

*Semi-Transparent Finish with Dry Brush Accents*

*Castle Rock with Dry Brush, Cottage White with Dry Brush, Harbor Mist with Dry Brush, Islander with Dry Brush, Seagrass with Dry Brush*

This finish process consists of the semi-transparent pigmented finish as described above with the addition of light dry brushed taupe accents to certain finished components and accessories\*. These dry brush accents complement the finish and further enhance the wood characteristics, door style details and decorative molding/accessory profiles. The glaze is blotted nearly dry and brushed in a manner that accentuates the various components. Brush strokes will be random and apparent and are considered a desirable aesthetic for these finishes. Dry brushing will vary in thickness, opacity and quantity. Dry brushing on species with open grain, such as oak, will appear darker compared to the closed grain character of maple. Matching finished interior flats of cabinet components do not receive dry brushed accents; however, in the example of a bookcase, if shelving is upgraded to 1½" thick profiled molding, the molding receives dry brushed accents. Back sides of cabinetry doors/drawer fronts do not receive dry brushed accents. A satin finish oven-cured top-coat completes the process and provides a superior sealed product.

\*Components which receive dry brushed glaze accents include: front side of doors and drawer fronts, decorative moldings, decorative accessories, wainscot material, all finished ends and all face frames.

Semi-Transparent Finish  
with Dry Brush Accents

Brush Marks

## Finish Select Program

The Finish Select Program offers the flexibility to go beyond our standard finish offering on wood, MDF and veneer door styles.

See following pages for available finishes and options; specialty finishes such as the Appaloosa Collection and the Stoney Brooke Collection are not available.

### Available Options for Wood Door Styles

- Finish Select allows you to specify existing Yorktowne Stains, Classic Paints, Coastal Sheer finishes or Custom Paints on existing Yorktowne wood species/door style combinations that are not currently available as standard.
- Optional specifications include:
  - Existing Yorktowne glazes in one of two applications: Highlight Only\* or Glaze with Highlight\*\*
  - Dry Brushing
  - Distressing options in one of three applications: Heirloom Distressing, Antique Distressing or Legacy Distressing

\*Highlight Only is not available on Gilmore door style.

\*\*Glaze with Highlight is not available on any paint.

### Available Options for MDF Door Styles

- Finish Select allows you to specify existing Yorktowne Classic Paints or Custom Paints on existing Yorktowne MDF/door style combinations that are not currently available as standard.
- Optional specifications include:
  - Existing Yorktowne glazes in a Highlight Only\* application
  - Dry Brushing

\*Highlight Only is not available on Nicollet-MDF.

### Available Options for Nicollet Door Style (Straight-Grain Veneer)

- Finish Select allows you to specify existing Yorktowne Stains or Coastal Sheer finishes on the Nicollet door style in existing Yorktowne Straight-Grain species that are not currently available as standard.
- Optional specifications include:
  - Existing Yorktowne glazes in Glaze with Highlight application
  - Dry Brushing

**NOTE:** Glaze & Highlight options ordered on Nicollet (Straight-Grain Veneer) will not receive highlighting on doors and drawer fronts; however, applicable moldings and accessories receive highlighting (exceptions noted in Sections 800 and 1000).

## Three Easy Steps

### 1. Submit a Finish Select Order Form specifying your finish selections.

For Custom Paint, please submit a color sample or for select paint vendors we will accept the paint color name and number; see order form for guidelines. Our color technicians utilize advanced technology to interpret your color sample and create a one-of-a-kind custom paint finish.

### 2. Review sample.

Samples will be produced based on finish selections, paint vendor color name and number or color sample submitted. Sample will be shipped for customer review to ensure color meets expectations, remaining sample will be retained by Yorktowne to confirm match when producing order.

### 3. When placing cabinet order, reference Finish Select sample order number of approved sample and submit signed Finish Select Agreement form.

The sample order number ensures cabinetry is produced using same color as approved sample.

## Additional Considerations

### Light Source

Color is affected by light and can appear different in various types of lighting. Please confirm your color match in the light and, if possible, the actual room where your cabinetry will be installed.

### Painted Finishes

Painted finishes for orders in wood door styles are applied to hardwood doors, drawer fronts and other cabinetry components; however, to achieve the highest quality finished product, we reserve the right to utilize engineered material in combination with hardwood material for various parts of cabinetry. This includes center panels of door and drawer fronts, end panels, back panels and other finished parts. Face frame material for orders in all material types will be consistently closed-grain hardwood material. As with any painted wood surface, expansion and contraction with changes in the climate will cause hairline cracking in the paint surface at joinery points. This is an acceptable characteristic and will vary based on climatic changes. *It is recommended to avoid applications with painted cabinetry where the climate cannot be regulated.*

**Remember to specify finished cabinet end treatments for exposed ends\* of cabinetry for the Finish Select Program.**

\*Certain cabinets include finished or flush finished wood ends as a standard inclusion; see individual cabinet specifications throughout this manual for details.

Please see order form for sample pricing and further details.

See page 200.9 for Finish Select Program details.

**REQUIRED:** Pick one base color.

Base color availability:

- Wood door styles – all base colors.  
EXCEPTION: paints are not available on the Tulsa door style.
- Nicollet door style in Straight-Grain Cherry/Maple/QS Oak – stains and coastal sheers.
- MDF door styles – paint options only.

Paints	Upcharge
Custom Paint* (includes CLSC)	24%
Aloe	8%
Bay Leaf	8%
Billow	8%
Blush	8%
Buff	8%
Buttercream	8%
Carriage Black	8%
Cayenne	8%

White Icing	8%

\*Color sample may be required for Custom Paints; see Finish Select order form for sample requirements.

See page 200.9 for Finish Select Program details.

## STEP 2 – GLAZE OPTIONS

**REQUIRED:** Pick no glaze or glaze color.

- Step 2 not applicable to Harvest Bronze EBN GLZHGLT.

### Paint Only – No Glaze

CLSC – Classic

Proceed to Step 4.

### Stain or Coastal Sheer Only – No Glaze

Proceed to Step 4.

### Stains, Paints and Coastal Sheer – Glaze Color

Pick one glaze color, proceed to Step 3.

BRN – Burnt Sienna	PWT – Pewter*
EBN – Ebony	RWU – Raw Umber
MCH – Mocha	SBL – Sable

\*Available in highlight only for Step 3.

## STEP 3 – GLAZE APPLICATION

**REQUIRED IF GLAZE COLOR CHOSEN** in Step 2.

Pick one glaze application.

- For orders in Nicollet and Gilmore door styles:
  - HGLT is not available.
  - Glaze & Highlight options will not receive highlighting on doors and drawer fronts; however, applicable moldings and accessories receive highlighting (exceptions noted in Sections 800 and 1000).
- Step 3 not applicable to Harvest Bronze EBN GLZHGLT.
- See Glaze Application descriptions on page 200.5.

Application	Upcharge
HGLT – Highlight Only	10%
GLZHGLT* – Glaze with Highlight on Stains and Coastal Sheers	15%

\*GLZHGLT not available on any paint. Paint/glaze combinations are available in Highlight Only.

### DESIGN NOTE

Glaze with Highlight options are not available on any paint.

## STEP 4 – DRY BRUSH

### OPTIONAL

- Available on any base color.
- Complements the base color and further enhances the wood characteristics, door style details and decorative molding/accessory profiles.
- Brush strokes are random and apparent.
- Varies in thickness, opacity and quantity.
- Appears darker on open grain species such as oak as compared to the closed grain character of maple.

Application	Upcharge
DRYBRUSH <i>Light dry brushed taupe accents</i>	15%

## STEP 5 – DISTRESSING

**OPTIONAL:** Pick one distressing technique.

- Not available on Blaine, Nicollet or MDF door styles.
- Available on any base color.
- Does not require glaze color.
- Cowtailing uses glaze selected; will be omitted from Legacy distressing if glaze is not ordered.
- See page 200.6 for further details on distressing options.

Distressing Technique	Upcharge
HRLM - HEIRLOOM <i>Machine dents, sand through</i>	3%
ANTQ - ANTIQUE <i>Hand dents, round over</i>	5%
LGCY - LEGACY <i>Antique plus rasping, pock marks, cowtailing</i>	13%

**Remember to specify finished cabinet end treatments for exposed ends\* of cabinetry for the Finish Select program.**

\*Certain cabinets include finished or flush finished wood ends as a standard inclusion; see individual cabinet specifications throughout this manual for details.

Please see order form for sample pricing and further details.

Door styles with this symbol are available with center panel options. See individual door style pages for center panel availability (flat, reverse raised, raised or beaded).

## Pick-A-Panel Door Styles

### One Style – Four Options

Center Panel options are available in 29 door styles. Pick a door style and one of four center panel options to create a unique look. Choose from flat, reverse raised, raised or beaded center panels. See door style pages at the end of this section for center panel availability, wood species availability, price group information, mullion availability as well as door, drawer and deluxe panel information.

**Dixon Flat (FP)**

**Dixon Reverse Raised (RR)**

**Dixon Raised (RP)**

**Dixon Beaded (BP)**

## Square Foot Door Pricing

### ■ DOOR

- Available in 1/16" increments.
- Minimum width 5", maximum 25".
- Minimum height 63/4", maximum 62".
- Doors can be bored for hinges. The number of hinge borings varies by door height, see chart below. To receive hinges specify LHINGE or RHINGE, see below.
- If doors are bored for hinges or includes hinges, bumper pads will be installed.
- If no hinge is selected there may be a small hole on back side of door created during the finishing process.
- Specify hinge requirements:
  - LPREP prep/bored for hinge left
  - RPREP prep/bored for hinge right
  - LHINGE hinge left, hinges included
  - RHINGE hinge right, hinges included
  - NH no hinge boring
- If door is being used for cabinet with recessed lighting modification, specify RLBR and hinge boring will be adjusted accordingly.
- Glass insert and mullion modifications available; see Section 1100.
- We do not identify base, wall, vanity and tall cabinet types; specify arch square door styles as needed.

Arch Door Style	Coordinating Square Door Style
Durango and Steinbeck	Higgins
Westcliffe	Crowley

- Doors outside minimums/maximums listed above as well as doors for sink bases with full-height doors\* will be considered through the Custom Quote Program.

\*Requires special hinge requirements.

### Hinge Quantity Per Door Height Chart

Door Height	Number of Hinges/Borings
Up to 35 1/2" high	2
35 5/16" – 60" high*	3
60 1/16" – 72" high	4
72 1/16" high and greater	5

\*EXCEPTION: Bottom doors on pantry cabinets (24PC) will receive 4 hinges; specify DOOR, PANTRY to receive 4 hinges.

## Square Foot Drawer Front Pricing

### ■ DRAWERFRONT

- Available in 1/16" increments.
- Minimum width 5", maximum 48".
- Minimum height 3", maximum 24".
- Bumper pads are installed.
- Drawer fronts outside the minimums/maximums listed above will be considered through the Custom Quote Program.
- See drawer replacements in Section 1200 for details on ordering drawer boxes.

SQUARE FOOT DOORS		Door Square Foot Pricing											
Door Size Category	Sq. Ft	1	2	3	4	5	6	7	8	9	10	11	12
Small	0 to 2.0	91	92	93	94	96	98	100	112	112	115	128	136

SQUARE FOOT DRAWER FRONTS		Drawer Front Square Foot Pricing											
Drawer Front Size	Sq. Ft	1	2	3	4	5	6	7	8	9	10	11	12
Small	0 to 1.0	199	199	199	203	207	211	215	240	241	246	275	292
Medium	Over 1.0	132	132	132	134	136	139	142	159	159	163	182	193

### DESIGN NOTE

See Section 1200 for door and drawer SKUs for the following specialty cabinets: Base/Wall Spice Racks, Bi-Fold, File Drawer, Diagonal, Glass Display/Bean Drawer, Lazy Susan, Lift and Stay, Pocket, Range Base, Spice Drawers, Square Corner Doors/Drawers, Tall Walk Through Pantry, Tambour, Tip Up and Vertical Lift.

### DESIGN NOTE

Door and drawer front standard configurations are shown on individual door style pages at the end of this section. **NOTE:** These specifications cover a majority of cabinet configurations; however, short doors or narrow drawer fronts may experience additional styling changes; contact Customer Care for specific details.

## Calculating Size and List Price for Doors and Drawer Fronts

### To calculate square feet for doors and drawer fronts:

- Multiply width x height. EXAMPLE DOOR: 21.5625 x 29.5 = 636.09375
- Divide above total by 144. This is your total square feet. 636.09375 ÷ 144 = 4.41731 . . . round to 4.42 – always round up to the second decimal.

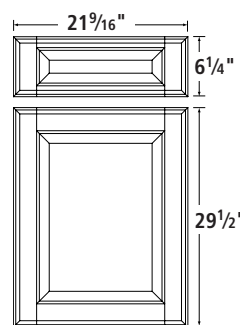

### To calculate the list price for each front:

- Follow the Door or Drawer Front chart to determine size category based on total square feet determined above (Small, Medium, etc.).
- Multiply total square feet by the list price/group applicable to door style: Crowley-Raised Panel/Maple (PG4) door example (Large size): 4.42 x 75 = \$331.50 List Price

**NOTE:** Finish upcharges and modification pricing will be additional.

Example door and drawer front – order specifications:

SKU	Width	Height
DOOR	21.5625	x 29.5
DRAWERFRONT	21.5625	x 6.25

Conversion Chart Fraction to Decimal					
Fraction	Decimal	Fraction	Decimal	Fraction	Decimal
1/16	0.0625	3/8	0.375	11/16	0.6875
1/8	0.125	7/16	0.4375	3/4	0.75
3/16	0.1875	1/2	0.5	13/16	0.8125
1/4	0.25	9/16	0.5625	7/8	0.875
5/16	0.3125	5/8	0.625	15/16	0.9375

**NOTE:** To find door style price groups, see chart on following page.

Oak	5

- Door and drawer fronts are constructed with 5/8" thick veneered engineered material with 13/16" thick solid wood mitered molding applied to all outside edges. This gives the appearance of ultra thin stiles and rails.
- **NOTE:** As with all mitered product, this door is susceptible to joint separation that may be more noticeable in painted finishes. Controlling humidity levels in the home is important and will help minimize potential separation.
- Grain direction is vertical on doors, horizontal on drawer fronts.
- Slab drawer front modification not available; drawer fronts 5" high and greater are not available without the applied molding.
- Deluxe panels, deluxe end modifications and items constructed using deluxe panels such as wood hoods are not available.
- Items receiving a profiled edge, such as spice drawers, starter molding, door profile solid stock, etc. will receive a 1/8" eased edge matching the Shaw profile.
- **NOTE ON FINISHES:** The Appaloosa Collection, the Stoney Brooke Collection, Antique Distressing, Legacy Distressing and Heirloom Distressing options are not available.

## Nicollet 1 1/4" Overlay

**DECORATIVE HARDWARE**  
R E Q U I R E D

Wood Species / Material	Price Group
Straight-Grain Cherry	7
Straight-Grain Maple	5
Straight-Grain QS Oak	8
MDF*	3

\*Available in Paint finishes only.

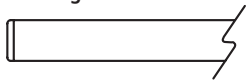

### Construction Details – Straight-Grain Veneer

- Door and drawer front are constructed from 3/4" thick veneered MDF material with 3mm thick, 6 ply wood veneer edge banding.
- Veneer on doors/drawers is quartersawn/riftsawn material. This cut of wood produces clean, straight vertical grain patterns.
- Doors and drawer fronts maintain slab design with vertical grain direction.
- Veneer on doors/drawers is not book matched, grain matched or sequence matched; graining does not line up between doors or drawer fronts.
- Orders in Nicollet Straight-Grain Veneer are constructed with standard cherry, maple or quartersawn oak cabinet components, face frames, finished ends (wood, flush or beaded) and accessories. Accessories follow cherry, maple or quartersawn oak species pricing; however, some accessories are not available in quartersawn oak and follow oak species pricing (noted individually throughout sections).

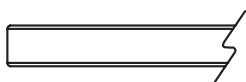

### Construction Details – MDF

- Door and drawer front are constructed from 3/4" thick MDF.
- Moldings ordered in MDF door styles will be constructed of maple and painted to match order selection.
- Orders are constructed with standard maple cabinet components, face frames, finished ends (wood, flush or beaded) and accessories. Accessories follow maple species pricing.

Detail of Door Profile –  
Straight-Grain Veneer

Detail of Door Profile – MDF

### DESIGN NOTE

For orders in Nicollet/Straight-Grain Veneer door styles, matching ends or decorative end panels on exposed ends are highly recommended for best match in grain pattern and species/finish.

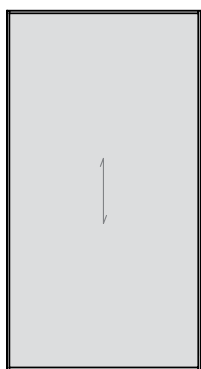

## Nicollet 1 1/4" Overlay

**Drawer Front Rules** – Shaded Art Shows Top Drawer Styling

SLAB  
All widths and heights

**Door Rules** – Shaded Art Shows Typical Door Styling

SLAB  
All widths and heights

**Specifications for Deluxe Panels** – See Section 1000

- Deluxe panels are not available for slab door styles.

### Veneer Specifications

The outer wood veneer of this door style is a natural wood product. An engineered core provides a stable, consistent substrate, virtually eliminating warping. Doors and drawer fronts feature wood veneer on front and back and wood edge banding.

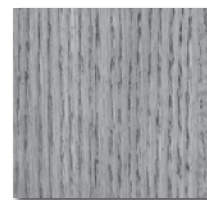

- Straight-grain cherry veneer is "A" grade heartwood with quartersawn/ riftsawn face and cherry edge banding. This cut produces a clean and consistent straight-grain appearance. Colors range from light pinkish-brown to dark reddish-brown.
- Straight-grain maple veneer is "A" grade heartwood with quartersawn/ riftsawn face and maple edge banding. This cut produces a clean and consistent straight-grain appearance. Color is creamy white with a fine texture.
- Straight-grain quartersawn oak veneer is "A" grade heartwood with rift cut face and red oak edge banding. Colors range from yellowish-tan to wheat color. Features a straight grain and coarse texture.

Straight-Grain Cherry

Straight-Grain Maple

Straight-Grain QS Oak

### MDF Specifications

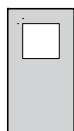

MDF (Medium Density Fiberboard) is an engineered wood product made by breaking down hardwood and softwood into wood fibers and combining with resin. Pressure and heat are then used to create a smooth surface with a consistent core. Painted MDF is durable and more resistant to warping, expansion and contraction than solid hardwoods. Moldings ordered in MDF door styles will be constructed of maple and painted to match your order selection.

### Decorative Door Availability

See Section 1100 for details.

Decorative Inserts
